SUMMARY

Former USMC Officer with 8+ years experience in Data Analytics and Process Improvement resulting in six figure cost savings. Significant experience communicating with and presenting to diverse stakeholders. Currently, Senior Business Intelligence Analyst for CAT's Supply Planning and Procurement Division.

TECHNICAL SKILLS

Microsoft Power BI, SQL (MySQL, PostgreSQL, SSMS), DAX, M, Dataflows, Power Automate, Azure DevOps, Snowflake, Tableau, OData, R, Python (Pandas), Microsoft Excel, Microsoft PowerPoint, Data Analytics, Data Presentation, RPA, Statistical Analysis, Data Cleaning, XML Documents, Tetris (Classical NES), Complex Problem Solver, Critical thinking, Motivated, Collaborative, Communicative, Passionate, Resourceful, Quantitative, Methodical, Analytical, Solution oriented.

PROFESSIONAL EXPERIENCE

Senior Business Intelligence Analyst
Caterpillar Inc.
July 2024- Present

• Overhauled a critical Snowflake stored procedure from 8,000+ lines to under 1,000 lines using advanced SQL and data modeling, incorporated LVHV data, enforced business rules, and enabled high-performance enterprise Power BI reporting solutions.
• Lead the design, development, and maintenance of enterprise Power BI dashboards and reporting solutions that deliver executive-level scorecards, KPI reporting, and self-service analytics supporting S&OP, demand planning, and manufacturing scheduling.
• Facilitated development of a scheduled distribution analytics solution used across all CI, ART and LNH manufacturing facilities; translated complex operational data into compelling, actionable insights that were presented to the EO Board, demonstrating measurable business value and value realization.
• Served as Project Lead for the Forecast Region Code Restructuring initiative impacting 29 tools; drove cross-functional collaboration with data engineering, digital, and business stakeholders, owned the master plan, risk tracking, change management, and post-cutover performance measurement.
• Act as S&OP Analytics ThoughtSpot Enablement Lead and Tier-2 expert: mentor analysts and business partners, deliver training, create enablement materials, and drive technology adoption and utilization during the enterprise transition from BIC to ThoughtSpot.
• Developed and automated Power BI refresh processes driven by Snowflake data (ETL and information management best practices); successfully deployed scalable solutions to 5 Infohub reports and 1 Toolbox report after evaluating multiple methods for performance optimization.
• Redesigned and productionized the Past Due Power BI report with updated data sources, enhanced data modeling, ARTS change tracking, and improved inventory status categorization to deliver intuitive visualizations of complex business trends and performance metrics.
• Deliver high-value ad-hoc analytics and strategic insights for S&OP leadership, translating business and operational data into clear recommendations, proportional factor evaluations, and Forecast Region analyses that influence decisions and support value realization.

• Built front-end support-ticket logging, status tracking, and KPI visualization solutions for Infohub and Toolbox, providing leadership with self-service analytics and visibility into key performance metrics and workload.
• Drive process improvements including Power Apps-based support task tracking and automated alerts, reducing manual effort, improving response times (≤ 24 hours), and enhancing operational efficiency through better information management.
• Maintain zero critical bugs in delivered reports and support tasks within the first three months post-release; consistently meet or exceed on-time delivery targets while ensuring visualizations follow best practices for usability, performance, and business impact.

Data Visualization Professional
Caterpillar Inc.
November 2022- July 2024
• Created a standardized budget dashboard for analyzing resource allocations by querying data from Snowflake and transforming the view in Power BI.
• Automated license tracking and implementation by producing a dashboard that extracts and transforms data from 4 distinct sources, sending automated email alerts via Power Automate; effectively reducing man hours and increasing productivity by more than an estimated 208 hours.
• Successfully transitioned CAT's Global Program Management (GPM) division to a standardized process of data visualization, by migrating all existing Tableau dashboards into Power BI, and redirecting 131 dashboards to pull from Dataflows.
• Developed over 130 visually appealing unique interactive dashboards, tailored specifically to Stakeholders' requests.
• Presented metrics data and innovation team updates at extended staff meetings for the entirety of GPM, consisting of 260+ individuals.
• Provided an immediate solution to a critical visualization error outside of CAT's control that affected over 500 dashboards by developing a Gantt Chart visual to display Program Management Data.
• Developed and automated a crucial dashboard for monitoring the GPM Toolbox (software) usage data providing necessary historical and current metrics that were directly leveraged in a decision-making conversation with the Microsoft Corporation.

Manufacturing Data Analyst
EnviroServe Chemicals, Inc.
July 2019- 2022
• Presented data visualizations via Power BI to Manufacturing Engineering Department to develop and maintain production standards after querying data with SSMS, and organizing legacy datasets through Microsoft Excel, resulting in cost-effective savings on average of $12,000 per month.
• Gathered data, provided monthly analysis reports, and effectively communicated with stakeholders of more than 15 separate manufacturing companies the current procedures and recommended implementations to drive informed decision making.
• Communicated effectively KPIs through Power BI leading to the production of a 27 page Standard Operating Procedure (SOP) for chemical implementation and maintenance, including step-by-step visualizations and detailed oriented guidance of roles and responsibilities.
• Developed relationships with stakeholders to gain an understanding of business drivers and objectives, working for a company that services top manufacturers in the US such as: Caterpillar, ELKAY, Energizer Battery, Scottland MFG, and more.

Field Artillery Officer (Operations Analyst)

United State Marine Corps
Sept 2012- Sept 2015

• Conducted detailed oriented data analysis on datasets containing 10,000+ data points, developing schemes for battalion live fire exercises and dashboard visualizations via Microsoft Power Point to communicate tactical control measures to highest ranking officials.
• Produced 63 page Standard Operating Procedure (SOP) for OPSEC, CBRN, and ORM to highlight the procedures and responsibilities that all Marines must perform in operational and non-operational environment in order to identify hazards and eliminate or reduce the risks associated with them.
• Demonstrated exceptional leadership skills by maintaining 100% training safety rate with 0% incidents as Range Safety Officer (RSO) and Officer In Charge (OIC) for 256 days of live fire training exercises by thoroughly planning precise surface danger zones (SDZ), organizing secondary and tertiary logistical maneuvers, and communicating clearly the training objectives.
• Developed Battalion's first automated Microsoft Excel spreadsheet actively displaying expiration dates for 240+ individual certificates for marines at 3rd Battalion, 12th Marine Regiment; color coded to denote length of time before certificate expiration date, dramatically improving training efficiency.

INDEPENDENT PROJECTS

SQL with Tableau Visualization - World COVID Dataset
February 2021 - October 2022

• Utilized 7+ SQL skills: Joins, CTE's, Temp Tables, Windows Functions, Aggregate Functions, Views, and Converting Data Types.
• Analyzed data to determine infection and vaccination rate per country, and demographics of vaccinations received.
• Created 2 dashboards to depict the information gathered and display the analysis conclusion.

Python

• Utilized 3 Python libraries: Pandas, NumPy, and Seaborn to create and display statistical analysis visualizations.
• Generated a 24 hour incremental scraping script that populates a dataset and automatically emails notifications.

EDUCATION

Campbell University **2019**
Master of Divinity (Distinction with Languages: Hebrew, Greek)
Buies Creek, NC

Gardner-Webb University **2011**
Bachelor of Arts in Religious Studies Minor in Theatre
Boiling Springs, NC
